AUTHOR Grumley, Fred K.
TITLE A Comprehensive Bibliography of Periodical Literature, Dissertations and Theses, and ERIC Documents Directly Related to Student Teaching in Music, 1948-1987.
PUB DATE May 89
NOTE 19p.
PUB TYPE Reference Materials - Bibliographies (131)

EDRS PRICE MF01/PC01 Plus Postage.
DESCRIPTORS Elementary Secondary Education; Higher Education; *Music; Music Teachers; Preservice Teacher Education; Resource Materials; Student Teacher Attitudes; Student Teacher Evaluation; Student Teachers; Student Teacher Supervisors; *Student Teaching; Teacher Supervision

ABSTRACT

The growth of an academic area can be measured by the growth of its literature. It is a natural corollary that the demand for excellence in education engenders a demand for literature. Due to the increased importance of student teaching as a final step in the preparation of future music teachers, it is timely to assemble as much bibliographic material as possible on teacher training in the field of music education. A total of 134 publications is presented, arranged by type of publication. Listed are 65 articles in nationally available periodical literature, 4 articles from state music magazines, 55 dissertations, and 10 ERIC documents. (JB)

Introduction

The growth of an academic area can be measured by the growth of its literature. It is a natural corollary that the demand for excellence in education engenders a demand for literature. Due to the increased importance of student teaching as a final step in the preparation of future music teachers, it seemed timely to assemble as much bibliographic material as possible in one place for such a topic.

The indexed history of literature pertaining to student teaching in music has shown a positive growth during its forty years from 1948 through 1987 (some 1988 literature is also included). These four decades of growth revealed the following output: 1948-1957, 17 publications; 1958-1967, 23 publications; 1968-1977, 39 publications; 1978-1987+, 55 publications. Thus a total of 134 publications is presented.

This search involved several indexing services and their inclusive dates. Below are listed the hardcopy and online services used.

Hardcopy

Dissertation Abstracts 1861-
Education Index 1929-
ERIC 1966-
Music Article Guide 1966-
Music Index 1949-
RILM 1967-

Online

Arts and Humanities Search 1980-
Dissertation Abstracts 1861-
Education Index (Wilsonline) 1983-
ERIC 1966-
PsycINFO (formerly Psychological Abstracts) 1967-
RILM 1972-

There were 65 articles found in the nationally available periodical literature. Almost two-thirds of this output was found in two periodicals under the auspices of the Music Educators National Conference: *Music Educators Journal*--31 articles; and the *Journal of Research in Music Education*--12 articles. The other 14 nationally available periodicals contained from 1 to 4 articles each.

The individual state music magazines yielded just 4 articles. Of course this literature was not indexed until publication of the *Music Article Guide* in 1966. Because the *Music Article Guide* indicates only the beginning page number of each article listed, the inclusive page numbers could not be given for the state music magazine articles. There were 55 dissertations and theses and 10 ERIC documents.

The contents are arranged by type of publication. Within each type the arrangement is alphabetical according to the first author's surname. For each nationally available periodical entry the details of publication follow this order: the name(s) of the author(s), the year of publication, the full title of the article, the name of the periodical, the volume number and/or issue number, and the first and last page numbers. Presentation of the state music magazines differs, in that the month of publication is given instead of volume number, and only the initial page number is given for each article.

For dissertations and theses the name of the university is stated exactly as it was listed by *Dissertation Abstracts* online. *ERIC Documents* include the town of origin as well as the Document Reproduction Service Number.

It is hoped that this compilation will assist future student teachers, cooperating teachers, university supervisors, and researchers in quickly locating appropriate literature for their respective endeavors.
